FOR BETTER PULP AND PAPER

## Wire winder

Turn wires into gold

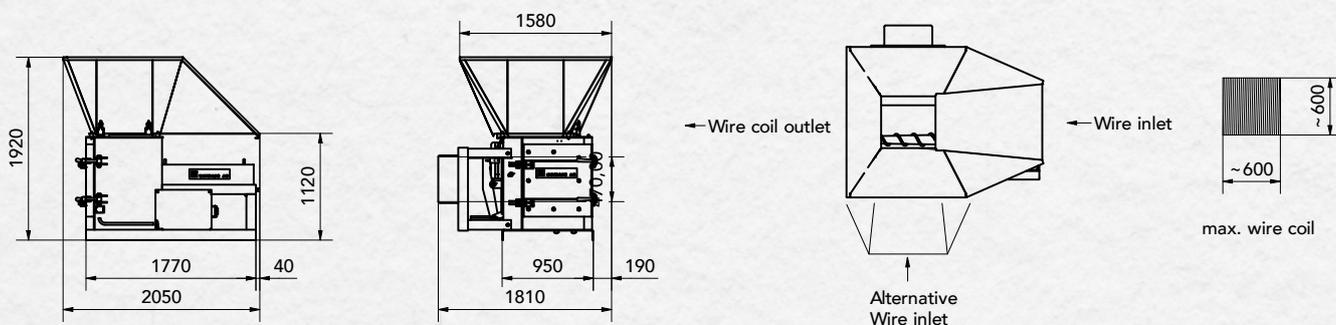

Recycling solutions for paper and organic waste.

# Specifikations

## Scrap bale wire winder TVS-411

The scrap bundling machine solves the problem which occurs when removing wire from e.g. pulp bales with rapidly increasing piles of waste wire which block factory and storage space.

The machine converts the wire rapidly and efficiently to compact wire coils which are easy to handle and attractive to the recycling industry.
